Message from the UNSGSA

**Briefing on Cybersecurity**, UNSGSA Fintech Sub-Group on Cybersecurity

What is cybersecurity?
- Protecting entities (individuals, organizations, etc.) from unauthorized access, use, disclosure, disruption, interception, or corruption of their systems, networks, or information.

What cybersecurity risks do customers face?
- Phishing: Trick customers into clicking on links or downloading malicious software.
- Malware: Infecting systems with malicious software to steal data or damage systems.
- Ransomware: Locking out access to systems until a ransom is paid.
- Social Engineering: Manipulating individuals into performing actions that may allow attackers to gain access to sensitive data.

- General

**Briefing on Data Privacy**, UNSGSA Fintech Sub-Group on Data Privacy

Why is data privacy important for financial inclusion?
- Ensures respect for user rights and privacy, which is essential for building trust.
- Helps prevent fraud and abuse, ensuring fair and equal access to financial services.

Opportunities:
- Improved risk management.
- Enhanced customer experience.
- Increased revenue.

Risks:
- Legal consequences of data breaches.
- Harm to reputation.
